

REACH (EG Nr. 1907/2006)
(Registrierung, Bewertung, Zulassung und Beschränkung chemischer Stoffe)

Bearbeitungsstand 17.01.2022

Confirmation about the compliance to REACH-directive (EU) No. 1907/2006 and RoHS-Conformity 2011/65/EU considering the current Annex II (2015/863/EU)

Dear Ladies and Gentlemen,

first of all I would like to say many thanks for your interest in our company and our products. As a distributor of electro-/mechanical components we are not a manufacturer of Substances (Chemicals) in sense of the above mentioned EU-directive and therefore we are not able to do the registration by ourselves. But we are able to confirm, that our pre-suppliers and manufacturers, guarantee the registration of chemicals, if it is necessary. Furthermore the components which we deliver to you are completely compliant to the EU-directive 2011/65/EU (RoHS) considering the current Annex II (2015/863/EU) and they do not contain any substances more than 0,1 Mass-% of the REACH-Candidate List of Very High Concern (SVHC=Substances of Very High Concern). If this situation is going to change in the future, we will inform you immediately.

This explanation is based on our present state of knowledge.

If you have any questions, don't hesitate to contact me.

Yours sincerely

Igor Petreski
